INTESTINAL MALROTATION RESEARCH SUMMIT

APRIL 17 – 18

University of Oklahoma Health Sciences
Hudson College of Public Health
Oklahoma City, OK *(with virtual option)*

Sessions for Gastroenterologists:

Although standard treatment for intestinal malrotation is surgical, many patients experience persistent and chronic GI symptoms including disorders of gut-brain interaction.

Join our two half-day summit to learn more about our multidisciplinary and patient-centered research to improve diagnosis, treatment, and long-term outcomes for patients.

Topics include:

- Feeding challenges after Ladd's
- Disorders of gut-brain interaction
- Trauma-informed approaches
- Patient engagement in research

REGISTER AT:
malrotationresearch.org

*Join us for a
Patient-Clinician
Networking
Dinner
April 17th 5-7pm*
