# INTESTINAL MALROTATION RESEARCH SUMMIT

**APRIL 17 – 18**

University of Oklahoma Health Sciences  
Hudson College of Public Health  
Oklahoma City, OK (*with virtual option*)

## ***Sessions for Rehabilitation therapists:***

Rehabilitation therapists—including physical therapists, occupational therapists, and speech-language pathologists—play a vital role in supporting individuals with intestinal malrotation and related complications. Many patients experience ongoing feeding difficulties, abdominal pain, and motility issues that impact their daily lives.

Join our two half-day summit to learn more about our comprehensive, multidisciplinary approach to research and improving care.

Topics include:

- Developmental care post abdominal surgery
- Feeding challenges after Ladd's
- Trauma-informed approaches and strategies

**REGISTER AT:**
